The first official day of the 2017-2018 Influenza Season was October 1, 2017 and the surveillance season will continue through September 30, 2018. Maricopa County identified its first locally-acquired influenza case of the 2017-2018 season in week 41.

(These numbers are provisional due to a slight back-log in data-entry.)

- Since October 1, 2017, **5718** cases have been laboratory-confirmed
- ILI (Influenza like Illness) indicators are on the rise in most settings.
- Maricopa County reported **1 Pediatric Influenza Death in week 46**
 - Influenza subtype was A/H3
- 12 Outbreaks have been reported this season

Influenza Activity	2017-2018	2016-2017	2015-2016	2014-2015
First Confirmed Case (no travel)	10/16/2017	10/3/2016	10/4/2015	10/3/2014
Weeks w/Widespread Activity (AZ)	Week 50-52 & 1	Week 6 - 9	Week 5 - 14	Week 1 - 6
Weeks w/ILI above Regional Threshold	Week 41, 43, 45-52 & 1	Week 49, 52 & 1-23	Week 51 - 16	Week 50 - 11
Weeks w/Outpatient visits above Threshold	Week 47 - 52 & 1	Weeks 47, 48, 50-52, 1-3, 5-10, 14 & 17-21	Weeks 45-52, 1-21, 23, 35 & 36	Weeks 48, 50-52, 1-10 & 12-14
Peak Week		Week 6 (2/5-2-11/2016)	Week 8 (2/21-2/27/2016)	Week 3 (1/18-1/24/2015)
Pediatric Deaths	1	1	3	1
Total Cases	5718	6,633	14,353	6,601

Individuals with Laboratory Confirmed Influenza

Trends of influenza laboratory test results compared to the previous 3 seasons. The current season is in **red**.

Table 1. Laboratory-Confirmed Influenza Cases Compared to Last Week and Last Season, Maricopa County	Cumulative Season Total	Current Week Total
2017-2018 Season	5718	1080
2016-2017 Season	328	79
5 Season Average (2012-2017)	347	283
% increase compared to 2016-2017 Season	1643%	1267%
% increase compared to 5 season average	1547%	282%
% increase compared to last week	81%	-27%

Types of Influenza in Maricopa County

Table 2. Influenza 2017-18 Season		
Types/Subtypes	Count	Percentage
Type A	5335	93%
Subtype 2009 H1N1	28	1%
Subtype H3	737	14%
Subtyping not performed or unknown	4570	86%
Type B	362	6%
Unknown	21	0%
Total	5718	100%

Graph 2: Confirmed influenza cases by Age-Group and Type.

*1 Influenza A is a confirmed case with unknown Age

Influenza Like Illness Activity at Hospital Emergency Departments

This influenza season there have been **5844** visits to emergency departments by individuals with flu-like symptoms. To be counted as an individual with flu-like symptoms, the patient must have both fever and cough/sore throat.

These show the number of patients with flu-like symptoms seen at 12 emergency departments.

This compares what percent of all emergency department visits were individuals with flu-like symptoms (fever and cough/sore throat). The graph shows the trend week by week, with the current season in **red**.

Influenza-Like Illness Activity at Sentinel Site Outpatient Facilities Reported to the Centers for Disease Control and Prevention (CDC)

Maricopa County sentinel sites (outpatient facilities) report visits due to flu-like symptoms. This week, **12.00%** of visits at outpatient facilities were due to flu-like symptoms, last week outpatient facilities reported **11.49%**.

Absentee Activity at Schools

Absenteeism trends compared to the last three school years show the percent of students reported absent and illustrates the week by week trend, the current school year in **red**. (School Surveillance will begins Week 40 thru Week 20).

The following report summarizes data captured from volunteer reports to the Flu Near You participatory surveillance platform between CDC Weeks 40 and 39 (October 2017 to October 2018). This report is intended to update Maricopa County public health professionals and other partners on system performance and results during the 2017-18 influenza season. Results are NOT final and may be subject to change pending further analyses.

Count of participants and rate of ILI cases per MMWR week in Maricopa County
Flu Season: 2017-2018

Why register for Flu Near You?

Registered users have access to many features, such as:

- The ability to report their symptoms
- A map that displays where users can find vaccines in their area
- A map of flu activity in their area and across the nation
- Updated news on the current flu season, flu shots, treatment, recovery time, and more

Everyone is invited to participate in Flu Near You by enrolling at

<https://flunearyou.org>

Outbreaks

An influenza outbreak in a long-term care facility, a rehab center, child/daycare or school is defined as an unexpected increase in the number of residents or students ill with influenza like symptoms over a given period of time. Outbreak data is subject to change as investigations may be ongoing.

***The Maricopa County Department of Public Health wishes to thank all of the
Influenza surveillance participants:***

Arizona Department of Health Services

Local Hospital Emergency Departments & Infection Control Practitioners

Local Outpatient Facilities and Medical Directors

Maricopa County Public Schools

Maricopa County Office of Vital Statistics
